PROFESSIONAL SUMMARY

Experienced React developer with over 3 years of expertise in building dynamic and responsive SaaS applications using modern tech stacks. Skilled in developing scalable, high-performance web solutions.

WORK HISTORY

React Developer (remote) | Clever Compliance - Sweden
05/2024 – current

- Provided ongoing support for the **Clever Compliance Hub**, a SaaS product, collaborating with cross-functional teams to resolve issues and implement new features.
- Worked with complex UI components such as Syncfusion Maps, Charts, Data Tables, and more.
- Technologies: React, TypeScript, Bootstrap, SCSS, Syncfusion, and other 3rd party packages.
- Conducted regular maintenance and updates to ensure security, performance, and customer satisfaction.
- Designed and developed the Clever Compliance company website from scratch using Next.js based on Figma, ensuring a user-friendly interface and seamless navigation.

React Developer (remote) | Jubee.eu - Vilnius, Lithuania
07/2023 – 04/2024

- Developed a comprehensive multi-currency wallet application from scratch using React and TypeScript based on Figma design
- Implemented complex multi-step forms with validation using React Hook Form and Zod.
- Integrated various external API services for functionalities such as currency exchange, IBAN account management, and card transactions.
- Implemented two-factor authentication (2FA) for enhanced security using modern authentication protocols.
- Leveraged React Query for efficient data fetching and caching, ensuring optimal performance.
- Styled user interfaces using Tailwind CSS to achieve a clean and consistent design across the application.

React Developer (on-site) | Rahat Bina PMS - Baku, Azerbaijan

10/2021 - 04/2023

- Led the transformation of a large property management system from vanilla JavaScript to a React.js application, enhancing scalability and maintainability.

- Designed and implemented multiple role-based interfaces to cater to different user roles within the property management system.
- Developed complex UI components including big calendars, date-pickers, data-tables, and charts to visualize property data effectively.
- Collaborated closely with backend developers to integrate front-end functionalities with backend services via RESTful APIs.
